

LEEDS

AUDIT & ASSURANCE

PLACEMENT 2021/2022

Welcome to BDO LLP, where we help people and businesses succeed.

As one of the UK's largest accountancy and business advisory firms, we're proud to work with a wide range of clients, from entrepreneurial enterprises to multinational groups, and we take the same pride in growing your career. With us, you'll get plenty of opportunities to develop your skills in areas that include auditing. But it's the people you'll meet who will really help you succeed.

At BDO, you can be yourself, sharing ideas and opinions with your team, and knowing you'll be respected and valued for your contribution. You can have confidence that you are part of an organisation with purpose, where you'll have variety and opportunity to build your career path alongside people who will help you succeed.

We work from 17 locations across the UK, but we're not just a UK business. We are also a member of BDO International, which has more than 1,500 offices worldwide, spread across more than 162 countries.

Audit & Assurance is the largest service stream within BDO, and our clients range from companies listed on the FTSE350 or AIM, to national Not-for-Profit organisations and fast-growing privately owned businesses with overseas operations.

We help them and their investors better understand their financial performance. Working in Audit is an opportunity to build a strong technical foundation in accountancy and finance while gaining vital business and commercial skills.

Working in Audit means much more than just analysing numbers. Get to know our clients and advise them on everything from financial performance and business systems, to culture and risks.

Our Audit Groups work across a large range of industries and sectors and have built a strong reputation in the market for providing deep sector specialism. As you begin your Audit journey with us, we will support you to develop your technical Audit skills across a breadth of clients, industries and sectors.

Each day will be different, with much of your time spent at your clients' premises (or interacting with them via technology while working at home guidance remains) talking to the different functions to understand the business being audited. You'll work as part of a collaborative team where you'll have all the support you need to acquire new skills and achieve your potential. You'll also be encouraged to share your ideas and the fresh perspectives you bring.

We are looking for an eager and competent placement student to contribute to our fast growing audit and assurance department in Leeds. The placement will be for a year from Summer 2021.

Please send your CV to [kay.x.yates@bdo.co.uk](mailto:kay.x.yates@bdo.co.uk) if you would like to be considered for the position. **Deadline for applications is 31 May 2021.**
